Chennai

PROFESSIONAL SUMMARY

Motivated B. Tech graduate in Artificial Intelligence and Data Science with a solid foundation in both Manual and Automation Testing. Well-versed in the SDLC, STLC, Defect Life Cycle, and test case design for functional, sanity, and regression testing. Hands-on experience writing automated test scripts using Selenium with Java, executing API testing via Postman, and querying databases using SQL. Proficient with Jira, Git, and Agile methodologies. Seeking an entry-level Quality Assurance / Software Test Engineer role to build scalable test suites, identify critical edge cases, and deliver robust software solutions.

EDUCATION

B. Tech (Artificial Intelligence & Data Science) (S A Engineering College)	2022 – 2026 CGPA 7.4/10
HSC (Sir Ramaswami Mudailiar Higher Secondary School)	2021 – 2022 85.5%
SSLC (Sir Ramaswami Mudailiar Higher Secondary School)	2019 – 2020 73%

TECHNICAL SKILLS

- **Software Testing:** Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, System Testing, UAT
- **Testing Concepts:** SDLC, STLC, Defect Life Cycle, Test Case Design, Test Scenario Preparation, Defect Reporting, RTM, Agile Methodologies
- **Automation & Frameworks:** Selenium WebDriver, TestNG (Annotations, Assertions, Data-Driven Testing)
- **API Testing:** Postman, REST API Testing, JSON
- **Programming:** SQL Basics, Java Basics
- **Tools:** Jira, Eclipse IDE
- **Operating Systems:** Windows

PROJECT

Food Recommendation System for Diabetes Patients: Developed a smart food recommendation system using neural networks to help diabetic patients make healthier dietary choices based on their nutritional requirements and personal preferences. The system analyzes user inputs and generates personalized meal recommendations to support better diabetes management. Performed data preprocessing and model training to improve prediction accuracy and recommendation quality. Built the solution using Python and machine learning techniques, focusing on delivering reliable, data-driven recommendations through an intuitive user interface.

INTERNSHIPS/WORK EXPERIENCE

Softrate Tech Park – Quality Assurance Intern (August 2026 – September 2026)

Executed manual and automated testing for Mozhibu, a digital book reading and writing web platform, validating core workflows including authentication, draft authoring, content publishing, and reader navigation. Built and maintained automated UI regression suites using Selenium WebDriver with Java and TestNG, implementing modular assertions to streamline repetitive regression cycles. Conducted cross-browser functional and sanity testing to verify layout responsiveness and dynamic UI components across devices. Logged, prioritized, and tracked software bugs through Jira, collaborating with developers across re-testing cycles to enforce the Defect Life Cycle.
